

I.C.U Style

We want to create a learning space with 3 main elements: comfort-convenience-creativity. Working space is one of the important factors affecting the performance and learning of faculty and students, so developing a good workspace is one of the top priorities. Beside comfort, creativity is also an indispensable factor to have more idea to do the job most effectively.

A prime example of a comfortable and creative office design style is Google's office design style.

In Google's offices, employees enjoy all kinds of working conditions to always feel at home. According to Larry Page, a psychologist and founder of Google, this is the reason why employees are more productive.

All Google offices around the world are designed smoothly between floors like this, and meeting rooms are also exposed as shown in the picture. Google's idea is that the whole company is essentially one, everyone needs to work together as a coherent team. In addition, they want to promote a culture of openness and transparency through such details. An inspirational and cultural way to inspire employees.

(Image at Google Singapore headquarters)

After tiring working hours, employees can enjoy entertainment facilities in the spaces designed with cheerful and youthful colors. (Image of Google headquarters in Zurich, Switzerland)

No more boring traditional stairs, everything is designed and arranged very creatively. (Image of Google headquarters in Zurich, Switzerland).

Meaning of I.C.U Map

School name: International Comprehensive University (ICU)

Slogan: Human potential is unlimited.

The schematic of the university is designed as a learning day - by students in school. From morning until the maximum includes the knowledge to recreational activities. The schematic such as a normal student time when looking towards the right corner is that in the morning students just cross the floors from the dormitory quickly and save time.

In academic buildings, the symbol of each floor is a specialized discipline. The pink building is the building that represents the dreams of students.

A: SPORT	C: ENGINEERING	E: ECONOMICS
B: ART	D: SOCIOLOGY	

The specialized department floor manages the disciplines. Order floors of rooms (Human resources, administration, finance, communications, engineering).

Library. Libraries are inspirational to provide equipment and such resources for all students and faculty during their study, research, and work.

Multi-purpose gym. The gymnasium is a full site of equipment for training and improving the health of all students through physical subjects and sports club activities. These priority members will retain school work.

Park. The iconic Ferris wheel is for everyone who can do relaxing activities after school.

Canteen. Canteen-coffee is a convenient location for all students to have meals and work in groups.

Shopping. The next place you will meet the mall is the place to shop for essentials for daily living.

Clubs. The club building here will be the place where you will spawn academic and technical club activities to satisfy your passion and develop yourself.

Watch the movie. We will entertain by watching movies and singing to try to be singers like small dreams. In addition, this is the site for skills training courses.

Dormitory. The last place to stop for a long time is the dorm. The apartment communities will help recharge for the next day.

Interview

I.C.U University's model is based on an open space platform, in order to create perfect conditions for all from students to lecturers and staff to develop comprehensively and effectively. Our team had a short interview with Mr. X, who is a trainee at Ton Duc Thang University. His job is to manage the school's admissions and image promotion. He shared that what he likes most about the school is "culture" because it is important to the school for all staff of the school to create a civilized - modern environment. In terms of factors, the important factor to develop a good educational environment is: the first is the school culture, the outstanding culture of queuing, and the outstanding culture of greeting of the School. The second is the vision of the leader such as: must have the foresight to create many development opportunities for the School, must have creativity, the ability to convey information, and the ability to assert and consistency. According to Mr. X, to become an ideal university, there must be facilities for comprehensive development and good quality education together.

Thereby, we build an ideal university model based on many factors learned and practical needs of learners to be able to develop comprehensively students' abilities. When entering the campus, student can study or work comfortably from morning to night from studying, eating, and entertainment. From modern facilities and equipments to learning and research to become more efficient and easy, such as how to design a library, or for roads, spiral staircases, ... Challenge students to think rather than impose knowledge through the curriculum. Therefore, the curriculum of I.C.U focuses on training basic theory combining professional practice right in the school environment. The school always creates conditions for students and staff of the school in all aspects: spirit, intellect, ... when necessary. In addition, the school leaders will share and disseminate common cultural systems so that creating a sustainable development environment.

Operating system
